SAXIX	\$53	0.52%

How did the Fund perform last year and what affected its performance?

Investment performance of the Fund is judged against the performance of certain market indexes. For this Fund, performance is compared to a broad-based securities market index (the “Regulatory Index”) known as the Morningstar® Global Core Bond Hedged IndexSM, which is composed of investment grade bonds and is designed to be representative of the global bond market overall. The Fund’s performance is also compared to an additional index (the “Additional Index”) known as the Morningstar® Global 1-5 Year Treasury Bond Hedged IndexSM, which is designed to measure the performance of global investment grade government bonds with maturities between one and five years. The Additional Index is closer in scope to the universe of securities that could be chosen within the Fund. The market indexes are unmanaged and do not involve fees and expenses like the Fund.

For the fiscal year ended June 30, 2026, the Fund had a net return of 3.93%, compared to a return of 3.22% for the Fund’s Additional Index. The Fund outperformed the Additional Index for the fiscal year by 0.71%, after deducting the Fund’s net operating expenses for the year. The outperformance was primarily due to the Fund’s overweight exposure (relative to the Additional Index) in higher grade bonds.

Fund Performance

The following line chart and table are intended to help you understand the risks of investing in the Fund. The chart shows the growth of \$10,000 over the past ten years. The table shows the total return for the selected time periods for the SA Fund as well as for the Regulatory Index and for the Additional Index.
